

INTEGRITY
ASSESSMENT GROUP
A MEMBER OF XCEL HOLDCO

Delivering Solutions with Integrity Across North America

XCEL and Integrity Assessment Group (IAG) together deliver a full spectrum of Non-Destructive Testing, Mechanical and Pipeline integrity, Cathodic Protection Services, along with specialty pipeline maintenance and repair across the energy, industrial, and infrastructure sectors. With over 35 locations nationwide, we support regulatory compliance, asset reliability, and operational excellence through innovation, experience, and integrity. All services can be safely and efficiently performed utilizing rope access to minimize downtime, improve safety, and reduce cost.

Why Choose XCEL & IAG?

Nationwide footprint and rapid response capability

All services available via certified rope access teams

Strong regulatory compliance with OSHA, API, and NACE standards

Advanced robotics and remote-access inspection technology

Multi-disciplined teams integrating NDT, RVI, MI, and Turn-Key construction services with PLI.

A shared culture built on safety, quality, integrity, and respect

Industries Served

Petrochemical/Refining • Chemical • Pipeline • Fabrication • Power Generation • Manufacturing
• Pulp & Paper • Mining • Transportation • Ethanol • Agriculture • Marine

Core Service Areas

01

Conventional NDT

Film Radiography, Ultrasonic Testing, Magnetic Particle, Liquid Penetrant, and Visual Testing.

02

Advanced NDT

Phased Array UT (PAUT), Time of Flight Diffraction (TOFD), Digital & Computed Radiography, Guided Wave, Eddy Current, and Corrosion Mapping.

03

Mechanical Integrity

API-certified inspections, data management, and PSM-driven programs for pressure vessels, tanks, and piping.

04

Pipeline Integrity

Program support, In-ditch assessments, all NDE and Advanced services, anomaly evaluation, Turn-key Direct Assessment (ECDA, ICDA, SCCDA), Turn-key ILI Digs (excavation and NDE).

05

RVI (Remote Visual Inspection)

Borescopes, PTZ cameras, crawlers, drones, and robotic inspection platforms for confined and hazardous spaces.

06

Power & Renewables Inspection

Services supporting gas, steam, nuclear, coal-fired, and wind energy facilities.

07

Corrosion Control Services

Corrosion engineers and technicians providing CP surveys, coating inspections, and material testing. CP Design, Atmospheric (visual and non-visual), Interference testing and Troubleshooting.

08

Cathodic Protection Installation

Deep anode, linear, and conventional ground beds with owned drill rigs. Induced AC mitigation, vacuum excavation test station installation.

09

Pipeline Maintenance & Reliability Services

Excavation, coating, maintenance, repairs, and rehabilitation support for pipeline and facility infrastructure.

10

Rope Access Services

Certified onshore and offshore RA technicians providing inspection, and maintenance support across all service lines.
